6. Progress in work related to international Species Action Plans (SAPs), Management Plans (MPs) and Brief Management Statements (BMSs)

6.1 Type of plan	Species Action Plans (SAP)
6.2 National plan adopted?	False
6.3 Measures linked to SAP/MP/BMS	Imperial Eagle is legally protected and classified as Endangered in the Greek Red Data Book.
6.4 Further Information	In the past it has bred in single trees or remnant riparian woods of deltas (Axios, Evros). It is now virtually extinct but may breed occasionally in Evros, Thessaly and on the border with the Former Yugoslav Republic of Macedonia. The decline is attributed to the cutting of old forests for reforestation, incidental poisoning linked to the poisoning of wolves, and shooting (B. Hallmann pers. comm. 1993).
